Starting a career as a Full Stack Developer, I bring a foundation of curiosity, problem-solving skills, and a relentless drive for innovation. My journey into web development is fueled by a deep passion for technology, and I am excited to embark on this path to contribute my skills and creativity to the world of digital solutions.

Certification

- Full Stack Development Bootcamp – JavaScript certification done from upGrad KnowledgeHut.
- React-The Complete Guide 2023 certification done from Udemy.
- Automation badge from Automation Anywhere university.

PROJECTS

● Food App| React-Native |Redux |FireBase

- Developed a dynamic and responsive mobile application using React-Native, utilizing modern CSS and React hooks to ensure a smooth user experience.
- Integrated a payment gateway to enhance application functionality, providing users with a seamless and secure payment process.
- Implemented state management using Redux Toolkit, ensuring efficient data flow and real-time updates within the application.
- Enabled user authentication and registration through Firebase, enhancing user security and personalization options.
- Facilitated table reservation functionality within the application, offering users the ability to easily book tables for their convenience.

● News App| React-Native

- Designed and implemented a feature-rich news app with user authentication, registration, and secure credential storage using AsyncStorage.
- Integrated API to fetch real-time news data, enabling users to search, filter, and access the latest news articles conveniently.
- Deployed the mobile app, ensuring a seamless user experience on both Android and iOS platforms.
- Implemented a user-friendly feature allowing users to view news content in detail via a web interface, enhancing user engagement and interaction.
- Developed a mobile application using React-Native, showcasing proficiency in cross-platform app development.

● Laundry App| React-Native

- 1. Developed a mobile application using React-Native to create a user-friendly laundry service app.
- 2. Implemented geolocation functionality to allow users to input their current location seamlessly.
- 3. Designed an intuitive user interface enabling users to select various types of clothing items, such as shirts, pants, and t-shirts, while managing their selections through Redux Toolkit for efficient state management.
- 4. Integrated a date and time selection feature, empowering users to schedule laundry pick-up and delivery at their convenience.
- 5. Leveraged Redux Toolkit for cart management, allowing users to easily add and review their selected items before confirming their laundry order.

Food Cart| React.js

- Developed a dynamic e-commerce website utilizing React.js, and CSS libraries to showcase a wide range of food items, enabling users to easily browse and explore the product catalog.
- Implemented a user-friendly shopping cart functionality integrated with Redux Toolkit, allowing customers to effortlessly add, remove, and adjust item quantities, enhancing the overall shopping experience.
- Designed an intuitive user interface with React.js to ensure seamless navigation and a visually appealing layout, contributing to improved user engagement and satisfaction.
- Utilized modern web development technologies to create an interactive online platform for food enthusiasts, demonstrating proficiency in front-end development and state management with Redux Toolkit.

Experience| Education

Junior Engineer | BIAL International Airport Terminal 2 Project

Oct 2019-Jan 2023

- Was a part of Kempegowda International Airport Terminal 2 construction
- Co-ordinate with L&T and BIAL ARCHITECTS during the project
- Dealing with Material Inspection Request (MIR) and Material Approval Request (MAR)

Bachelor of Engineering (B.E.) Civil Engineering

2019

- Dr. Ambedkar Institute of Technology
- CGPA: 7.69

Pre-University Course (PUC) Science

2015

- Seshadripuram Composite Pre-University College
- Percentage: - 72.5%

Skills

- **Languages:** JavaScript, Node.js, HTML/CSS
- **Libraries:** React-Native, React.js, Express.js, Redux Toolkit, Mongo DB
- **Tools:** MS suite, Postman, GitHub version control, Jest, VS Code, Linux Commands
- **OS:** Windows OS, Mac OS
